Sequence 6458, Application US/09198452A
PATENT NO. 6559294
GENERRAL INFORMATION:
APPLICANT: Griffais, R.
TITLE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragments
TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, preventive of INVENTION: and treatment of infection
FILE OF INVENTION: and treatment of infection
FILE REFERENCE: 9710-003-99
CURRENT APPLICATION UNMERE: US/09/198,452A
CURRENT FILING DATE: 1998-11-24
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 6232, Application US/09198452A

Patent No. 6670465

GENERAL INFORMATION:

APPLICANT: University Technologies International Inc.

TITLE OF INVENTION: REFINAL CALCIUM CHANNEL (ALPHA) IF-SUBUNIT GENE

TITLE OF INVENTION: REFINAL CALCIUM CHANNEL (ALPHA) IF-SUBUNIT GENE

TILE REFERENCE: 45499.4 (formerly 45074.6)

CURRENT APPLICATION NUMBER: US/09/495,714C

CURRENT FILING DATE: 2000-02-01

NUMBER OF SEQ ID NOS: 138

SOFTWARE: Patentin version 3.1

SEQ ID NO 130

LENGTH: 20

TYPE: DNA

ORGANISM: Homo sapiens
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        US-09-495-714C-125/c
